Work Experience

Freelance Web Developer

Self-employed | January 2021 – May 2023

- Developed and maintained websites using WordPress, JavaScript, HTML, and CSS.
- Created and customized WordPress themes and plugins to enhance website functionality.
- Designed responsive, SEO-friendly websites for various clients.
- Integrated third-party APIs and payment gateways for e-commerce projects.
- Managed multiple projects, ensuring timely delivery and client satisfaction.

Front-End Dev, SoftUni, Sofia

June 2023 - March 2024

- Collaborated with a team of talented instructors and developers to create cutting-edge course content.
- Actively participated in internal projects, fostering a culture of continuous learning and skill development within the company.
- Contributed to the development of interactive learning platforms, enhancing the overall educational experience for students.

Evaluated and Created Exams about Express.js, React.js, Angular, TypeScript, Html And Css, Node.js, and other frameworks.

SAP Consultant and Middle Front-End Dev, Roiable, Sofia

March 2024 - January 2025

- Worked as a middle front-end developer, utilizing React.js, JavaScript, HTML5, and CSS3 to create responsive and dynamic user interfaces for web applications.
- Collaborated with back-end developers to integrate SAP systems, customizing solutions to meet specific business needs for a globally recognized beverage company.
- Contributed to the development of a Process Builder (unreleased) tailored for a high-profile international client. Ensured cross-browser compatibility and optimized application performance, enhancing the user experience across multiple platforms.

Team Lead Front-End Developer

January 2025 - Present

- Led a development stream at 1-Stream, mentoring and managing two interns by providing hands-on training and guidance in front-end technologies and best practices.
- Worked on multiple client projects, including one high-profile, unreleased application where I was solely responsible for building the entire application.
- For this project, I utilized Swift, Kotlin, Java, and React Native, integrating APIs such as Google Billing, Facebook Login, and Google Login to create a seamless, user-friendly experience.
- Successfully balanced leadership responsibilities with hands-on coding,
